

High School Summer Nandagikendan (Seek to Learn) Academy Report July 6th-9th, 2021

The annual Summer Seek to Learn Academy was held July 6th-9th and was virtual due to COVID. Four students registered for the Academy and two students attended all the events. There were four one-hour sessions each day of the Academy. Although the attendance was decreased with the virtual format, the two students had never attended a Seek to Learn Academy event before and found the Academy to be very helpful as they continue their journey of determining what their options were for after high school.
